

SurveyMethods

Step by step tutorial demonstrating launching of a survey
remotely using the API

Introduction

The following presentation describes how to launch a survey remotely using the API included in the SurveyMethods REST API.

There are two types of programming languages which you can use to integrate with SurveyMethods and execute the “Launch a Survey Remotely” API:

1. HTML
2. JavaScript/Jquery

In this presentation, the execution of this API is explained using **HTML**.

Steps for Integration

1. **Generate an API key**

2. **Trigger a Remote Activation request with an HTML form**

3. **SurveyMethods Processes the Following: API request, Launching of a Survey, and Sending Invitation(s)**

4. **Test the Integration**

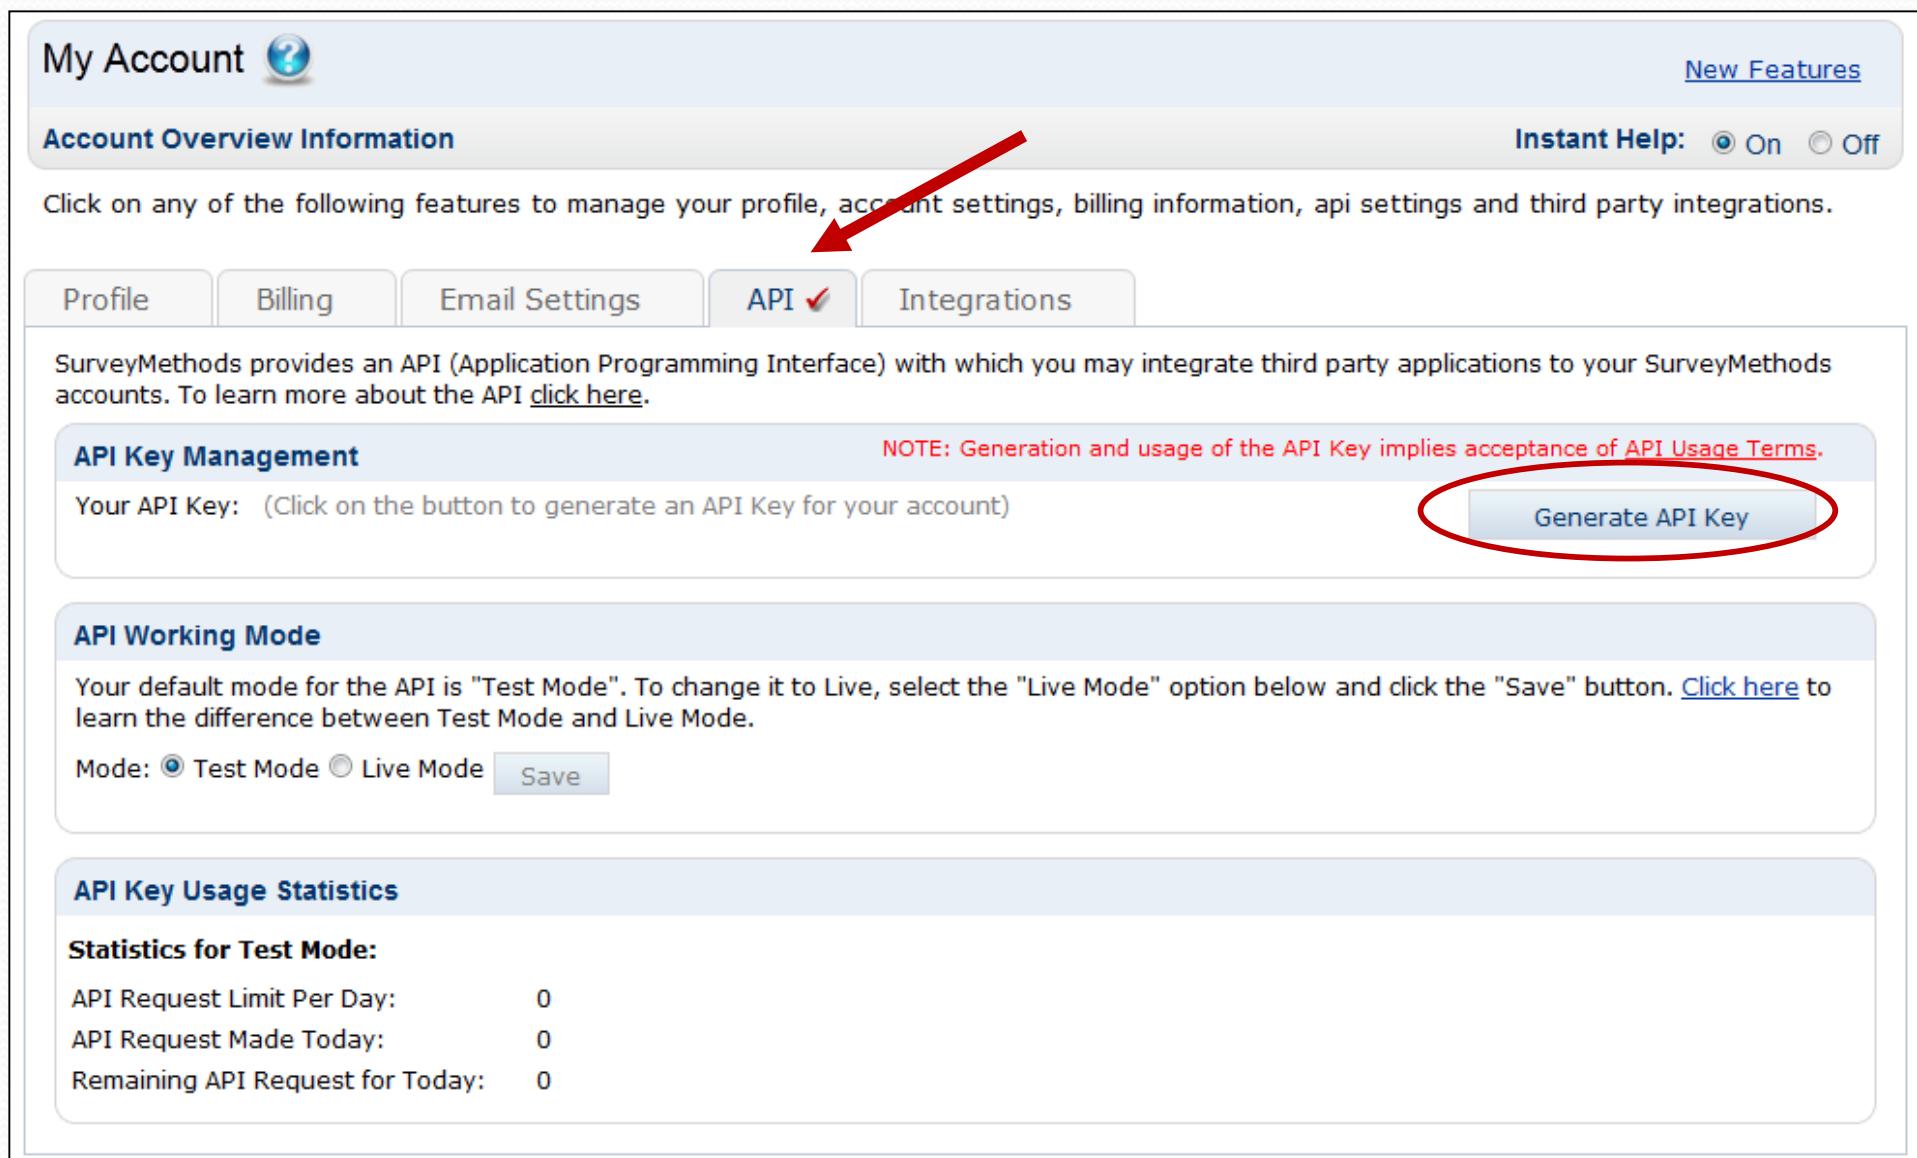

5. **View the API Usage Statistics & Activity Reports**

6. **Change the API mode from Test to Live**

Step 1: Generate an API Key

- Login to your SurveyMethods account.
- Go to the “My Account” page.
- Click on the “API” tab.
- Copy your API key displayed or generate your API key by clicking on the “Generate API Key” button.

The screenshot shows the 'My Account' page with the 'API' tab selected. A red arrow points to the 'API' tab, and a red oval highlights the 'Generate API Key' button. The page includes sections for API Key Management, API Working Mode, and API Key Usage Statistics.

SurveyMethods provides an API (Application Programming Interface) with which you may integrate third party applications to your SurveyMethods accounts. To learn more about the API [click here](#).

API Key Management NOTE: Generation and usage of the API Key implies acceptance of [API Usage Terms](#).

Your API Key: (Click on the button to generate an API Key for your account) [Generate API Key](#)

API Working Mode

Your default mode for the API is "Test Mode". To change it to Live, select the "Live Mode" option below and click the "Save" button. [Click here](#) to learn the difference between Test Mode and Live Mode.

Mode: Test Mode Live Mode [Save](#)

API Key Usage Statistics

Statistics for Test Mode:

API Request Limit Per Day:	0
API Request Made Today:	0
Remaining API Request for Today:	0

Step 2: Trigger a Remote Activation request with an HTML form

Create an HTML page

Set the <meta> tag attributes

Set the <form> tag attributes

Name the <textarea> tag id

Execute the HTML file

Create an HTML page containing the following elements:

- Form
- Textarea

```
<html>
<head>
  <title></title>
</head>
<body>
  <form>
    <textarea></textarea>
    <input type="submit" value="Submit" />
  </form>
</body>
</html>
```

Step 2: Trigger a Remote Activation request with an HTML form

Create an HTML page

Set the <meta> tag attributes

Set the <form> tag attributes

Name the <textarea> tag id

Execute the HTML file

Set the <meta> tag attributes:

- **http-equiv="Content-Type"**
- **content="application/x-www-form-urlencoded; charset=UTF-8"**

```
<html>
<head>
  <title></title>
  <meta http-equiv="Content-Type" content="application/x-www-form-urlencoded;
  charset=UTF-8" />
</head>
<body>
  <form>
    <textarea></textarea>
    <input type="submit" value="Submit" />
  </form>
</html>
```

Step 2: Trigger a Remote Activation request with an HTML form

Create an HTML page

Set the <meta> tag attributes

Set the <form> tag attributes

Name the <textarea> tag id

Execute the HTML file

Set the <form> tag attributes:

- **method="POST"**
- **action= "https://api.surveymethods.com/v1/{ login_id }/{api_key} /surveys/{survey_code}/remotelaunch/"**

```
<html>
<head>
  <title></title>
  <meta http-equiv="Content-Type" content="application/x-www-form-urlencoded;
charset=UTF-8"/>
</head>
<body>
  <form id="frmAPIPost" method="post"
action="https://api.surveymethods.com/v1/myloginid@mydomainname.com/ldbnATfDu8Vv2g7
F1HztIQ/surveys/1A05B2RSA7QTSYHB/remotelaunch/">
    <textarea></textarea>
    <input type="submit" value="Submit" />
  </form>
</body>
</html>
```

Step 2: Trigger a Remote Activation request with an HTML form

Create an HTML page

Set the <meta> tag attributes

Set the <form> tag attributes

Name the <textarea> tag id

Execute the HTML file

Set the value for id of the <textarea> tag as “RAContent”

```
<html>
<head>
  <title></title>
  <meta http-equiv="Content-Type" content="application/x-www-form-urlencoded;
  charset=UTF-8" />
</head>
<body>
  <form id="frmAPIPost" method="post"
  action="https://api.surveymethods.com/v1/myloginid@mydomainname.com/ldbnATfDu8Vv2g7
  F1HztIQ/surveys/1A05B2RSA7QTSYHB/remotelaunch/">
    <textarea id="RAContent" name="RAContent" rows="25" cols="80"></textarea>
    <input type="submit" value="Submit"/>
  </form>
</body>
</html>
```

Step 2: Trigger a Remote Activation request with an HTML form

Create an HTML page

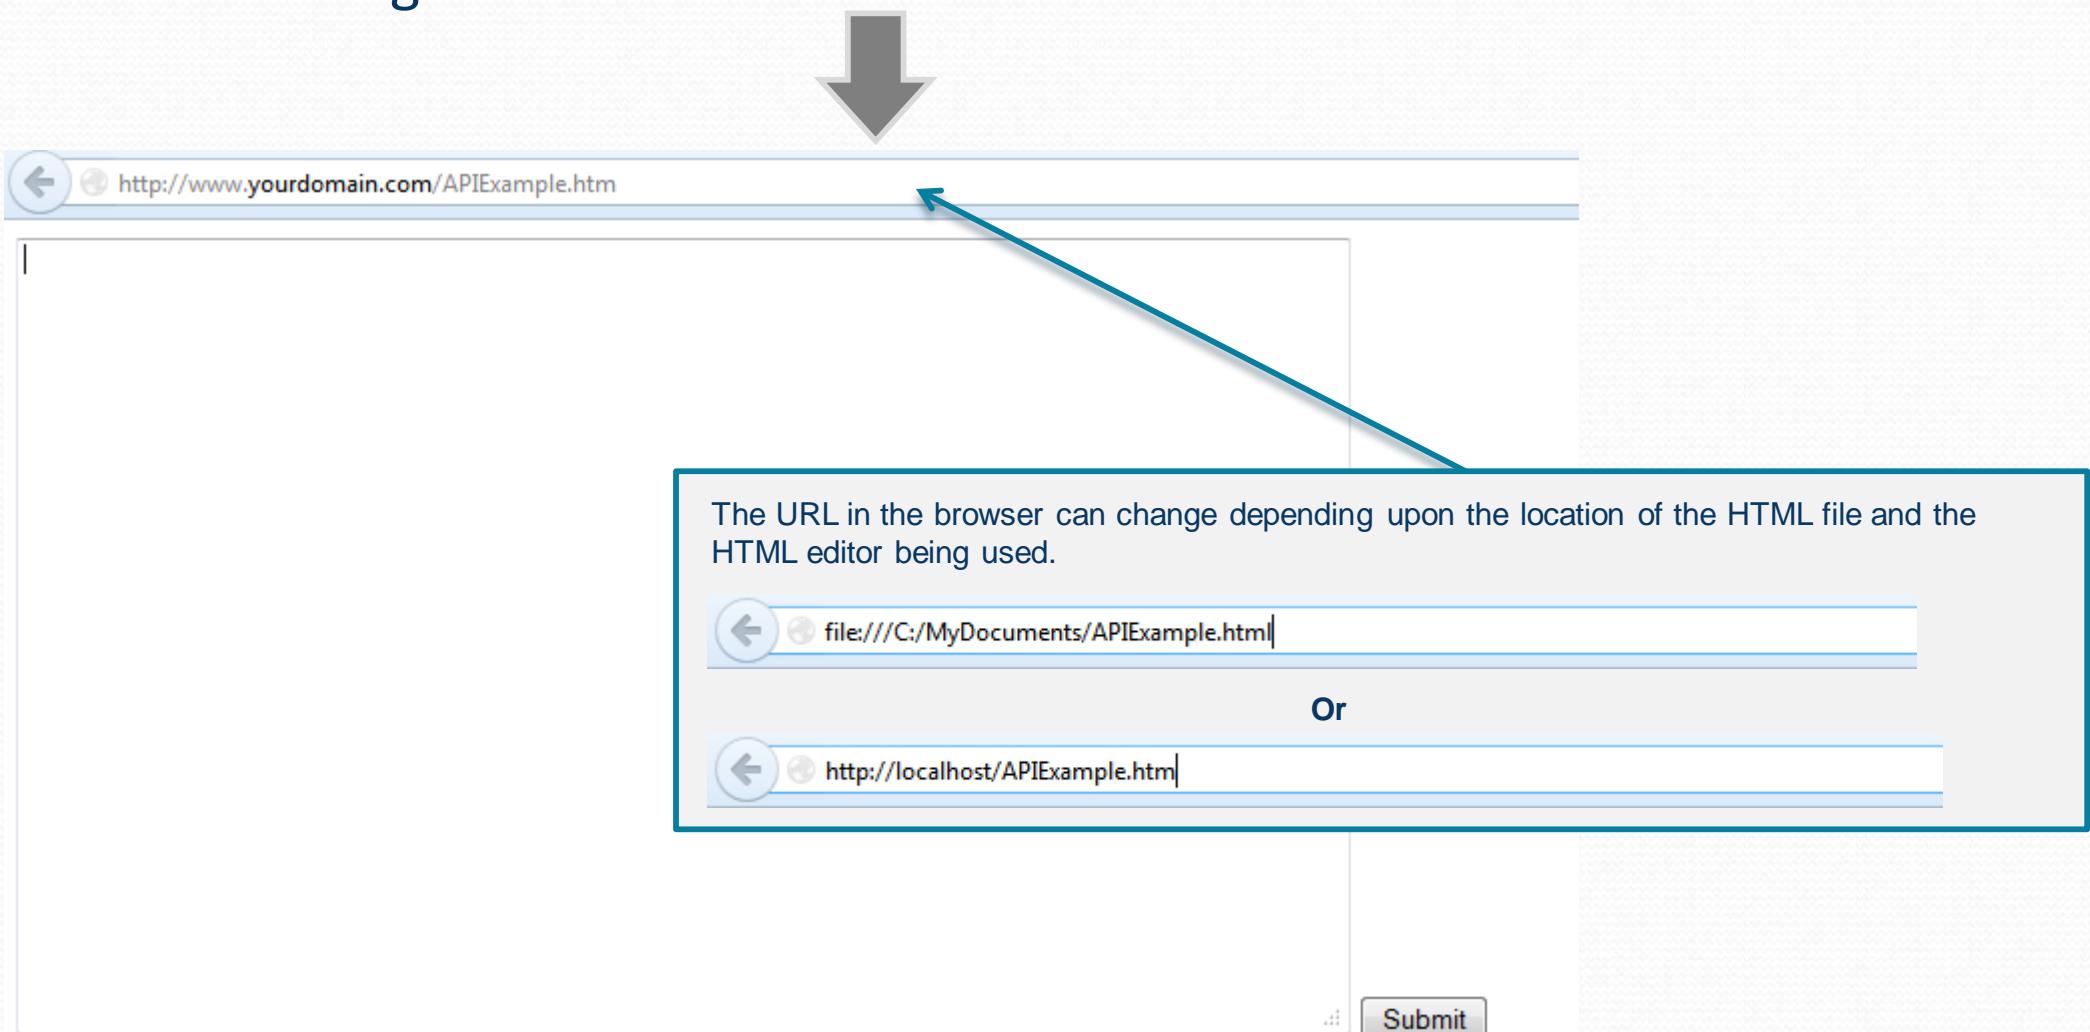

Set the <meta> tag attributes

Set the <form> tag attributes

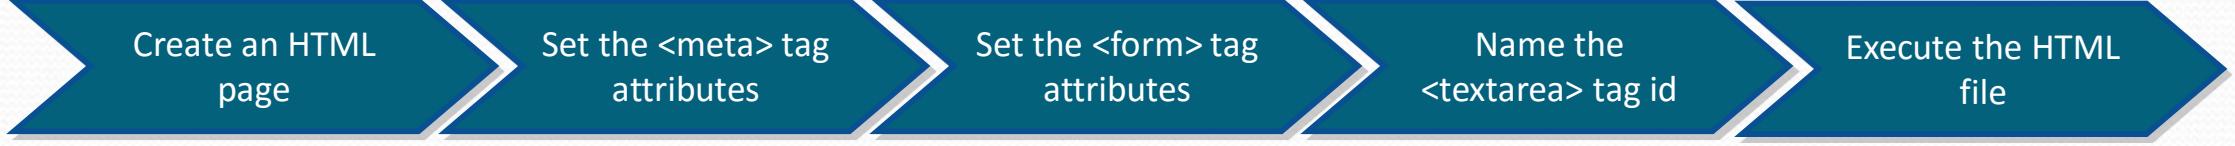

Name the <textarea> tag id

Execute the HTML file

Execute this HTML file by opening it in a browser. The output will be displayed as a text area along with a “Submit” button.

Step 2: Trigger a Remote Activation request with an HTML form

- Create an HTML page
- Set the `<meta>` tag attributes
- Set the `<form>` tag attributes
- Name the `<textarea>` tag id
- Execute the HTML file

Enter the remote activation request in the text area in the format as shown on the left hand side below. The **labels** must be specified in the same format as shown. Replace the dummy values of the labels with actual ones:

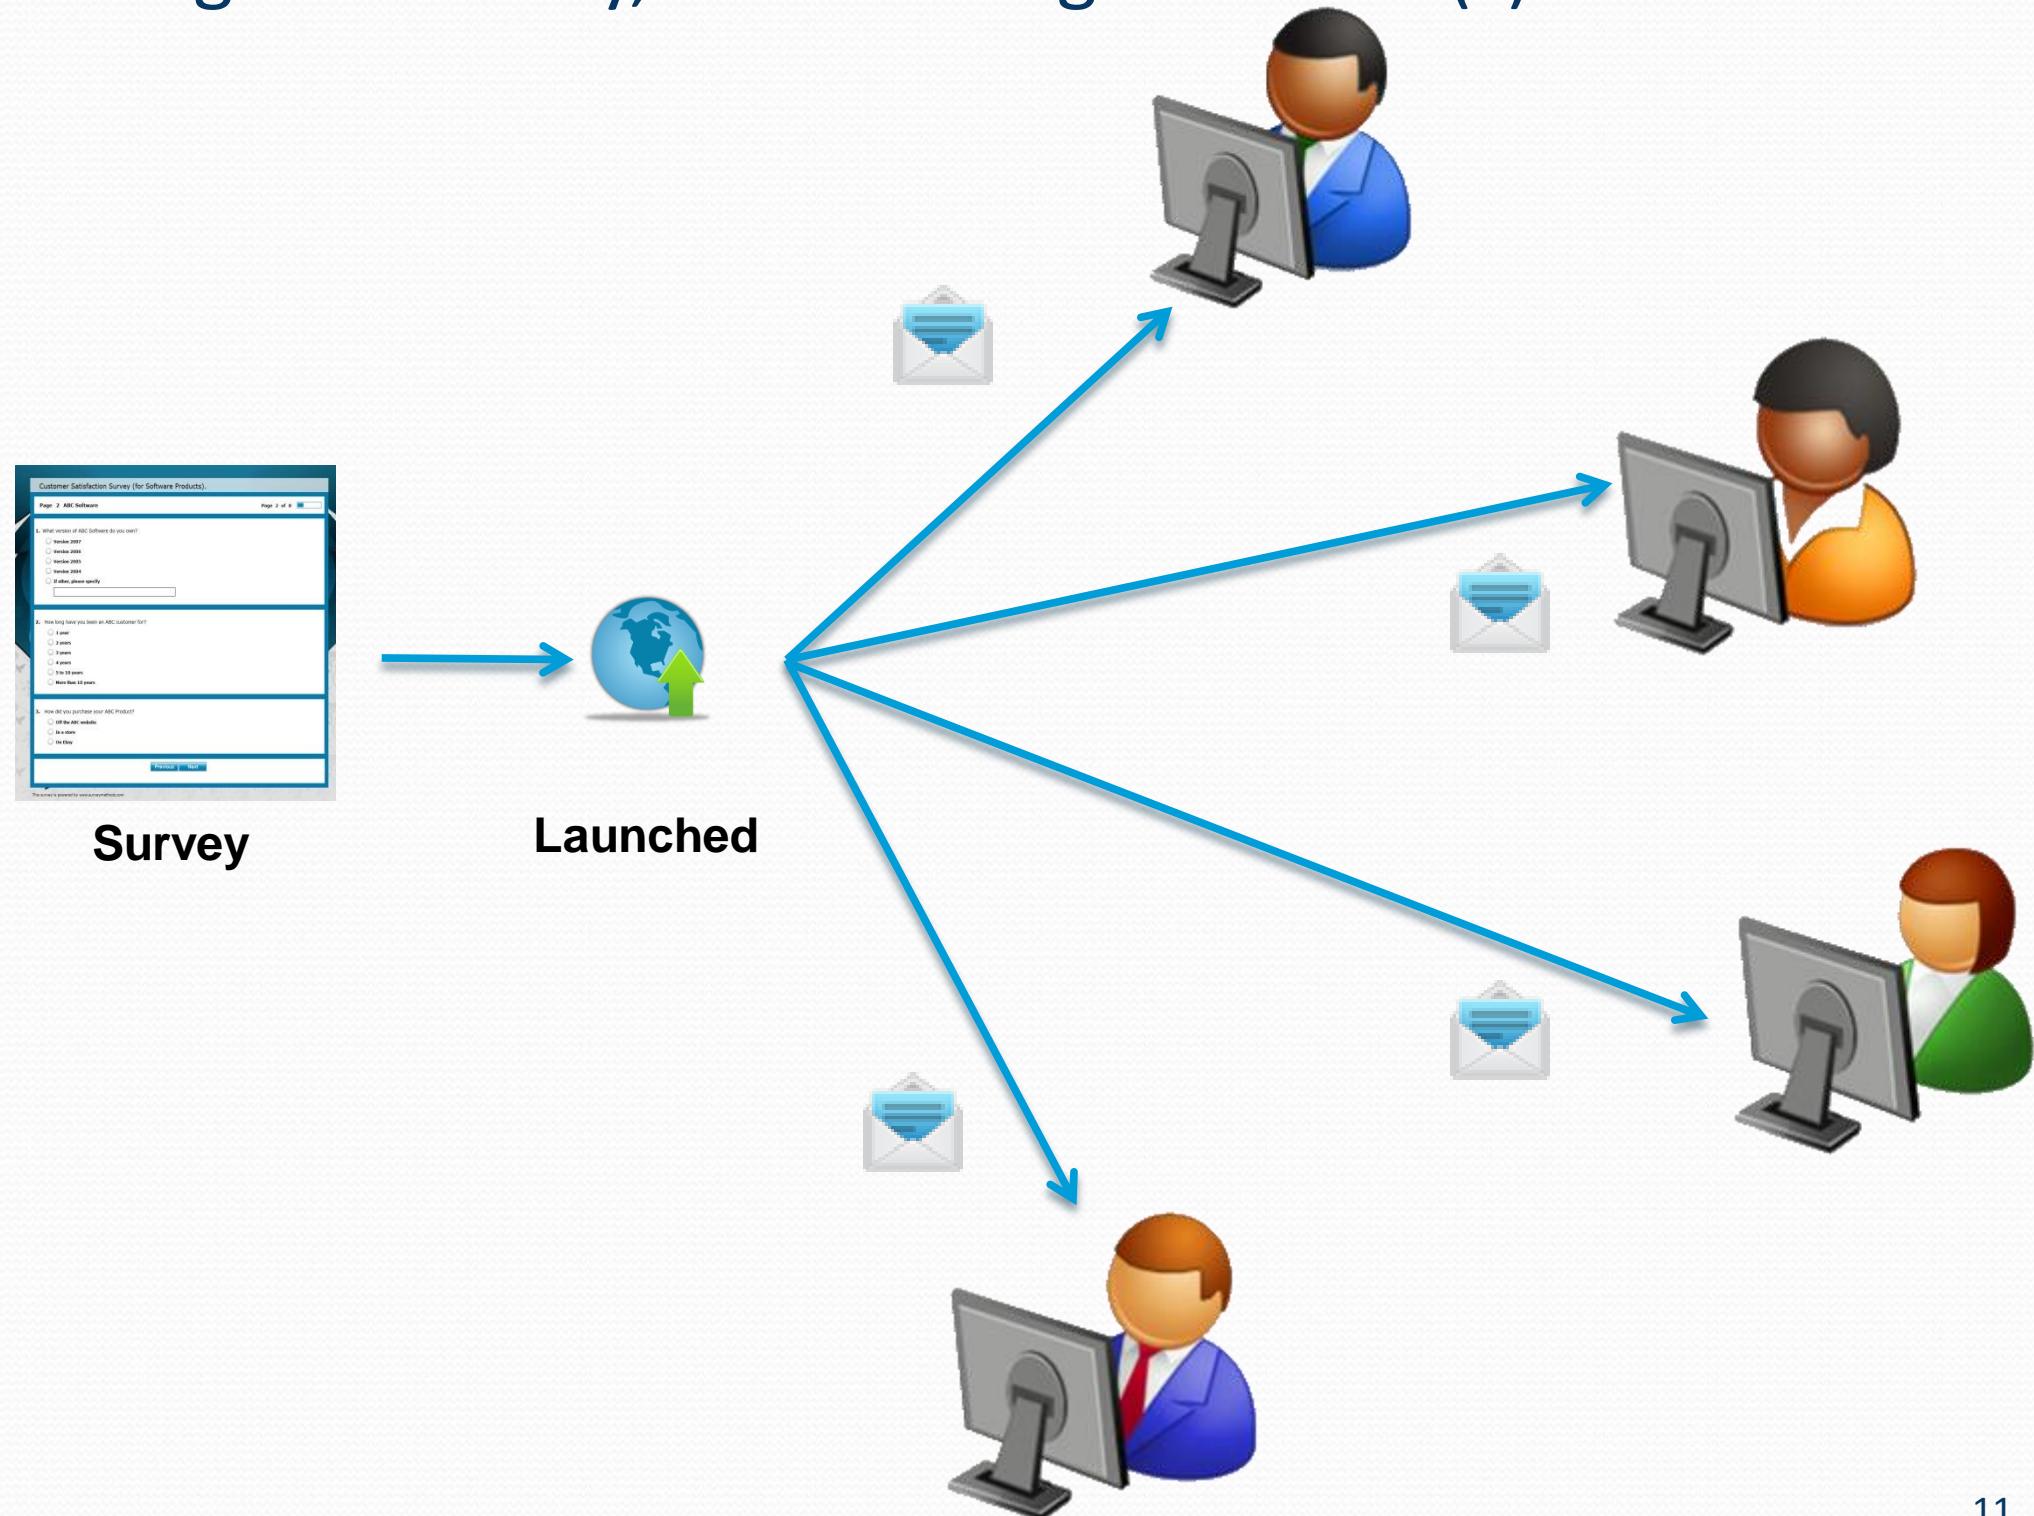

```
[SenderId]sender@gmail.com
[LoginId]smuser@gmail.com
[SurveyCode]ABCDEFGHIJKLM
[SendtoStart]
firstuser@gmail.com,categoryvalue1,categoryvalue2,
categoryvalue3,categoryvalue4, categoryvalue5;
seconduser@gmail.com,categoryvalue1,categoryvalu
e2,categoryvalue3,categoryvalue4, categoryvalue5;
[SendtoEnd]
[Categoryvalue1]Name
[Categoryvalue2]Company
[Categoryvalue3]Incident ID
[Categoryvalue4]Office
[Categoryvalue5]Service Representative
[EOF]
```

Label	Meaning
[SenderId]	Email Address of Remote Launch request initiator or Request Sender user.
[LoginId]	Email Address of registered user with SurveyMethods.
[SurveyCode]	Survey code of the survey linked with [LoginId] for which survey remote activation is to be triggered.
[SendtoStart] & [SendtoEnd]	Comma separated list of recipient email addresses to which the survey will be launched, and custom field values in a predefined format.
[Categoryvalue1] to [Categoryvalue5]	Name of the custom fields.
[EOF]	Defines the end of Remote Activation input.

Step 3: SurveyMethods Processes the Following: API request, Launching of a Survey, and Sending Invitation(s)

Step 4: Test the Integration

- In this step you need to test for the following points:
 - ✓ Successful integration of your application with SurveyMethods with the use of the REST API.
 - ✓ After executing the function call, ensure all your recipients have received the survey invitation email and they are able to take the survey.
 - ✓ After your recipients have taken the survey, ensure that their responses are shown in the Analyze section.

For help with getting your API to work, please [click here](#) to contact our support team.

Step 5: View the API Usage Statistics & Activity Reports

- Go to the My Account Page and API tab to view the API requests usage limits and statistics.

API Key Usage Statistics	
Statistics for Live Mode:	
API Request Limit Per Day:	15
API Requests Made Today:	5
Remaining API Requests for Today:	10

- Go to the Survey Settings Page to view the Survey Remote Launch Activity report.
